

INDUSTRIAL CLEANING

VACUUM TRUCKS FOR LIQUIDS

ATEC Rental's wet vacuum trucks are Amphitec V-Force machines. As standard, these vacuum/pressure machines are equipped to ensure maximum efficiency when vacuuming wet substances. Thanks to the highly intuitive controls of the units, your operators will need very little time to get familiar with and start using the rental equipment. These machines can easily vacuum liquids over long distances.

See below for the standard specs of our wet vacuum trucks. If you need a machine that, besides vacuuming, can also do high-pressure cleaning, ask about our wet vacuum combination trucks!

TECHNICAL DETAILS

| | |
|--------------------------|--|
| Brand model | Amphitec V-Force |
| Product tank | 12 m ³ |
| Water tank | 1 m ³ |
| Clean water tank | 4 m ³ |
| Tank material | Stainless steel 316L |
| Vacuum pump | Liquid ring pump, 3200 m ³ /h |
| Max. Vacuum | 95% |
| Max. Overpressure | 2 bar |
| HP Pump | 50L/120bar |
| Certifications | SIR/ADR |

USED FOR
