

INDUSTRIAL CLEANING, CONSTRUCTION VACUUM TRUCKS - HI-LIFT

ATEC Rental's Hi-lift vacuum trucks are Amphitec Vortex machines. These vacuum/pressure machines are equipped to make your vacuuming and blowing operations as efficient as possible. Thanks to the highly intuitive controls of the units, your operators will need very little time to get familiar with and start using the rental equipment. These machines are able to vacuum dry and wet substances and blowing of free flowing dry materials over long distances, as well as to discharge the material from the tank by, for example, depositing it into big bags and containers.

TECHNICAL DETAILS

Brand model	Amphitec Vortex
Tank volume	14 m3
Tank material	Stainless steel
Vacuum pump	Amphitec roots blower, 9000 m3/h
Max. vacuum	96%
Max. overpressure	1 bar
Brand chassis	MAN 4-axle chassis
Extra	Hi-Lift System

USED FOR

- Sucking up residues
- Removal of contaminated material due to spills or emergencies
- Removal of fly ash and contaminated soil
- Removal of residues from production processes
- Cleaning and emptying of residues in silos
- Supply and removal of roof ballast (roof gravel/roof substrate)
- Supply and removal of insulation material in difficult to reach and narrow spaces
- Supplying raw material for drainage purposes
- Discharging from tank into big bags and containers
